SUPPLEMENT NO. 2 TO DRIED AND FROZEN EGG MEMORANDUM NO. 12

To: Regional State and Resident Supervisors and Samplers

From: B. W. Kempers, Senior Marketing Specialist, Inspection and Grading Division, Dairy and Poultry Branch

Subject: a. Record of amount of eggs processed in drying plants  
b. Barrel Packaging of Dried Eggs  
c. Table of Contents

- A. Effective as of the date of this memorandum the resident samplers at egg drying plants shall record on FDA-388 the following information:
1. Number of cases of shell eggs processed for drying.
  2. Number of inedible shell eggs denatured
  3. Number of pounds of inedible liquid eggs denatured
  4. Number of pounds sub-standard frozen eggs produced
  5. Number of pounds acceptable dried eggs produced from eggs reported in Item 1.
  6. Number of pounds no grade dried eggs placed under seal.

This information will be used by the Audit Division of Procurement and Price Support Branch in determining dried egg costs, and shall be as nearly correct as possible. It will also serve as the basis for preparing your FDA-188's. State supervisors shall return all FDA-388's for completion whenever the above requested information is not recorded.

- B. The following is a memorandum received from the Procurement and Price Support Branch. Please be guided by the memorandum when examining barrels for meeting specifications:

"Answering your memorandum of February 8, there have been no formal designations made of authorized coöperage concerns so that no list of such coopers exists. However, each dried egg manufacturer must satisfy himself that reconditioned barrels are as good as new, and that barrels come from an established coöperage concern - not a second-hand dealer or repair man. In any event, the resident sampler has the responsibility of rejecting barrels which in his opinion do not meet contract requirements in all respects.

C. Table of Contents.

1. Reference table to Requirements for Facilities, Operating Procedures and Sanitation . . . . .	Pages 1-2
2. Duties and responsibilities of Resident Supervisors . . . . .	" 2-3
3. Deviations of specifications . . . . .	Page 3, par. 8
